(g) Environmental Standards Bonus.

1. Conditions for Bonus. At the discretion of the Planning Board, a density bonus may be granted to an applicant under the following conditions:

i. If the applicant demonstrates to the Planning Board's satisfaction that the proposed structure and/or use shall comply with at least half the standards listed below in sub-section (g).2, in any combination, then the Planning Board may award either or both a density and a height bonus.

- (2) Such height bonus shall allow an increase in height from 50 feet to no more than 60 feet.

2. Environmental Standards. The following items are actions, materials, or programs that an applicant in the General Commercial District may adopt either to mitigate potentially adverse environmental impacts or to improve the subject site's environment.

i. Green Building Design. Green building design is the practice of increasing the efficiency with which buildings use energy, water, and material resources while reducing building impacts on human health and the environment during the building's lifecycle.

- (1) Generally, the applicant shall demonstrate to the Planning Board that green (sustainable) design measures will be used. Some measures are:
 - a) Site planning: e.g., responsiveness to climate features such as sun and wind, microclimate management, solar orientation (long axis facing south); landscaping for summer cooling effect and for blocking winter winds; parking areas designed to limit heat absorption.
 - b) Efficient water use: e.g., use of water conservation measures including dual water systems if available, water recycling.
 - c) Efficient energy, materials and resources use: e.g., use of daylighting; use of appropriate glass for minimizing heating and cooling loads, use of building materials in construction and maintenance of site features, use of materials in environmentally sound ways, such as Energy-Star products and certified lumber, use of insulation beyond minimum standards, use of renewable

energy for heating and cooling, use of energy efficient motors, use of energy efficient lighting, use of energy management systems.

- (2) Specifically, one set of criteria for green building design is known as LEED and is promulgated by the U.S. Green Building Council (USGBC). LEED (Leadership in Energy and Environmental Design) is a certification program aimed at design and construction practices. LEED provides technical and criteria-based standards for environmentally sustainable design, construction and operation. The program includes a building rating system for new construction for use by designers, builders, developers, and building owners.
 - (3) To qualify for a bonus, the applicant shall demonstrate green building design, whether LEED-compliant or the equivalent, before the Certificate of Occupancy is granted.
- ii. Stormwater Management. To qualify for a bonus, the applicant shall demonstrate that the stormwater management program includes, among other components, the following permanent components:
- (1) Roof garden, also known as a green or living roof.
 - (2) Bioswales and/or rain gardens.
 - (3) Permeable surfaces to replace impervious surfaces for on-site parking, driving, and walking.
 - (4) Grey water recycling systems.
- iii. Pollution. To qualify for a bonus, the applicant shall demonstrate that:
- (1) Light pollution. No outdoor light generated on the site shall spill over the property line.
 - (2) Noise pollution. Mechanical noise emitted from roof-mounted equipment shall not be perceptible beyond the property line. Mechanical equipment shall not be allowed on green roofs [see ii(1) above].

- iv. Sustainable Energy. To qualify for a bonus, the applicant shall demonstrate that the project will use one or more of the following energy technologies:
 - (1) Thermal mass technology.
 - (2) Photovoltaic technology.

4-8.6. Automobile Parking Spaces. Automobile parking spaces shall be provided on the site of any development in an amount determined by the Planning Board, as a part of its action on the site plan of this development, as provided in § 4-8.8. of this chapter, to be adequate to provide for the parking of the vehicles of all persons employed on the site and all other persons who may be expected to visit the site at any one time for any purpose, whether as customers, purveyors, official visitors, guests or otherwise. In making such determination, the Planning Board may take into account the likelihood of multiple use of the parking space in connection with other uses on the site.

4-8.7. (Reserved)

4-8.8. Site Plan Approval. In any development established (after the effective date hereof), the location of main and accessory buildings on the site and in relation to one another, the traffic circulation features within the site, the height and bulk of buildings, the provision of off-street parking space, the provision of other open space on the site landscaped buffer, the display of signs, and the provision of fences, walls and landscaping shall, in addition to conforming to any and all regulations pertaining thereto that are specifically set forth in this chapter, be in accordance with a site plan or plans or subsequent amendment thereof approved by the Planning Board. The parking space provisions, landscaping, fences and walls included in any site plan approved by the Planning Board shall be provided and maintained as a condition of the establishment and maintenance of any use to which they are appurtenant. In considering any site plan hereunder, the Planning Board shall endeavor to assure safety and convenience of traffic movement, both within the limits of the site and in relation to access streets, harmonious and beneficial relation among the buildings and uses on the site, and satisfactory and harmonious relation between the site and contiguous land and buildings and adjacent neighborhoods, all in furtherance of the purposes of this chapter.

4-8.9. Enforcement and Guaranties. No building permit or certificate of occupancy shall be issued for any building or use except in accordance with a site plan approved as provided in §4-8.8. The purpose of requiring such approval is to safeguard the purposes of this chapter and the developmental policy set forth herein and to protect the general welfare of the Village and the values of the property therein against the detrimental effects of possible failure actually to complete a development in any such

district as contemplated in the rezoning of land therefore and the leaving of the same in an unfinished and unsatisfactory condition. To these ends, the Planning Board shall require such guaranties or conditions as it may deem to be necessary in order to assure that such development will actually take place and will proceed to completion.
