11. Will the proposed action create a hazard to environmental resources or human health?	<input type="checkbox"/>	<input type="checkbox"/>

Part 3 - Determination of significance. The Lead Agency is responsible for the completion of Part 3. For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

<input type="checkbox"/>	Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
<input type="checkbox"/>	Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action will not result in any significant adverse environmental impacts.

DRAWING SPECIFICATIONS

- ❑ Site location map, showing the general location of the property within the Village of Tuckahoe (required for all applications)
- ❑ Current property survey, prepared and certified by a Land Surveyor licensed in the State of New York (required for all applications involving a change to the site plan -- e.g., increase/decrease in building footprint, increase in paved surfaces, addition of accessory structure, etc.)
- ❑ Proposed site plan drawing(s), based on and citing the certified property survey, showing:
 - required, existing and proposed zoning setbacks
 - existing and proposed structures
 - dimensions
 - existing and proposed contours at maximum 2-foot intervals, extended at least 10 feet into adjoining properties and to the center line of any adjacent street
 - elevation of the existing grade at the four or more principal building corners
 - elevation of the proposed grade at the four or more principal building corners
 - proposed storm water management plan including drainage calculations. Stormwater facilities must be provided to accommodate any net increase in impervious surfaces on the site based on zero increase in the rate of discharge for the site and designed for a 50-year storm event (7.5 inches of rainfall)
 - proposed sediment and erosion control plan
- ❑ Proposed floor plans
- ❑ Gross floor area (GFA) plan clearly showing the gross floor area of each story of the building. (required for both new construction and additions)
- ❑ Proposed building elevations, including:
 - proposed materials and finishes
 - dimensions
 - elevation of the principal eave, based on a surveyed bench mark
 - elevation of the highest ridge line, based on a surveyed bench mark
- ❑ Construction details, including all retaining walls over 2 feet high
- ❑ All plans for applications for construction of commercial structures must include a certification that the structure meets the requirements of the New York State Energy Conservation Construction Code.
- ❑ Electrical, plumbing, HVAC and fire suppression/alarm system schematics (hard-wired fire alarm systems must be installed in accordance with the New York State Building Code).

Note: Certain items noted above may be waived depending on the scope of proposed work.
