Regular examination of your mouth, lips, tongue, teeth, and gums by an oral care specialist can help spot oral cancer, precancers, tooth decay, and other problems early, when they are most treatable.

NewYork-Presbyterian Lawrence Hospital is providing a free 20-minute oral health screening for adults aged 18 and older by dentists, dental hygienists, and other oral healthcare providers.* If the examination shows that you need additional care, we can connect you with an oral care provider for follow-up. Spanish-speaking providers will be available.
